

The Contractor is to check and verify all building and site dimensions, levels and sewer invert levels at connection points before work starts.
 The Contractor is to comply in all respects with current building legislation - British Standard Specifications, Building Regulations etc. - whether or not specifically stated on this drawing.
 This drawing must be read with and checked against any structural, geotechnical or other specialist documentation provided.
 This drawing is not intended to show details of foundations, ground conditions or ground contaminants. Each area of ground relied upon to support an structure (including retaining walls) must be investigated by the Contractor. A suitable method of foundation should be provided allowing for existing ground conditions. Any aspect of the ground, contaminants on or within the ground, should be further investigated by a suitable expert. Any earthwork considerations shown indicate typical values for guidance only and should be further investigated by a suitable expert.
 Where existing trees are shown to be retained they should be subject to a full Arboricultural Inspection for safety.
 All trees are to be planted so as to ensure they are a minimum of 5 metres from buildings and 3 metres from drainage and services. A suitable method of foundation is to be provided to accommodate the proposed tree planting.
